Teach Natives Trades

Great progress in the development of the Firestone trade schools was also reported. Mr. Firestone said that the natives were very anxious to learn under the instruction of the Firestone technical staff. The dark-hued Liberians are being taught to be carpenters, blacksmiths, plumbers, electricians, automobile mechanics, sanitary en-

Mr. and Mrs. Harvey S. Firestone, Junior, now in the African jungles, today broadca ted the first message sent from the special radio station recently erected on the Girestone rubber plantation in the atterior of Liberia, on the West coast of Africa. The message ras received at a similar station to the roof of the Firestone factors. As a result, Monrovia, the capital of Liberia, has established.

munication with the interior of the accessible countries. Heretofore, the method used was to send foot messengers through jungle trails, taking days to get in touch with the outside world. Broadcasting by radio direct from one continent to another thus gives the Firestone Tire & Rubber Co. a great advantage in developing its million acres of rubber lands that were secured from the Liberian government. Although these properties are located over 5,000 miles from the Firestone headquarters at Akron, Ohio, it will now be possible to send reports every day by radio from the Liberian plantations to Akron.

100,000 Acres Laid Out

Mr. Firestone, Jr., has been in Liberia since early January. In his first report by radio today, he said that the Liberian government officials were enthusiastically cooperating with Firestone in the company's great undertaking to make Liberia one of the important rubber-growing countries of the world. Mr. Firestone said that during the first year two 50,000-acre plantations had been laid out, one on the Du river and the other 150 miles south of the Du on the Cavalla river.

Firestone engineers in the same time had constructed over 75 miles of roads and had built and established headquarters on the two plantations, with housing facilities for the resident staffs of 118 Americans. Power plants for the development of electric power, light and refrigeration had been built, as well as hospitals and trade stores for the benefit of the Americans and also to supply the needs of the 15,000 natives who are employed in clearing the jungles and planting rubber trees.

1,500,000 Trees Planted

Wr. Harvey S. Firestone, Sr., has successfully arranged a \$5,000,000 loan in America for the Liberian on a firm financial basis, and permits the development of the important rubber and permits the development of the important rubber etchnical staff are helping to organize the 2,000,000 or more native Liberian sand give them remunerative employment which had not been hitherto available in their own country. The natives are proving very adaptable and willing to work in an organized way. This has made possible the clearing and planting of such a large acreage during the past year and has undoubtedly had a very appreciable effect in the recent reduction in the price of crude rubber.

European newspapers have carried many articles deriding Firestone for going into Africa to plant rubber. They claimed the soil was poor for rubber growing and that the natives would not work. The British government now realizes that Firestone's Liberian enterprise is anything but

1,500,000 Trees Planted

During the past year, according to Mr. Firestone's first radio report, over 1,500,000 rubber trees have been planted on a total of over 15,000 acres of cleared jungle lands. This is a record in rubber plantation work. It is the largest purples of trees set out and acres

plantation work. It is the largest number of trees set out and acres planted by any single company in the same length of time. And Mr. Firestone stated that the rate of progress in clearing land and planting rubber trees is being con-

stantly increased.

Mr. Firestone reported that the

Mr. Firestone reported that the steamship sent over for service had been placed in commission along the Liberian coast and is now linking up the Firestone plantations and the coast towns of Liberia. He expressed the hope that Firestone will soon have its own vessels operating directly between

vessels operating directly between New York and Liberia, making the Atlantic passage in less than two weeks. When this is done, it will not only give Firestone an advan-

tage of from two to five weeks in time as compared with other rub-

CLEAN POLITICS AND HONEST ELECTIONS.

County officers should frown on any effort to embarrase the sacred right of franchise. As Probate Judge fixthed in our Home Demonstration work in the County. Dependent and delinquent child life has been blessed by our Child Welfare program of service given in a great and lasting manner. Thousands of dollars have been brought to Coffee County from the State and Federal Governments for these splendid agencies of service motto in politics as in religion. The purchase of public office most usually results in scandal. A man who would results in scandal.

BEAT NO. 19. results in scandal. A man who woul BEAT NO. 14—BOX 2. A. C. Bryant, O. O. Cooper, H. W. buy public office would sell it for his R. I. Davis, J. W. Davis, Homer Ellenburg, Managers; Claud Bailey own profit. All good citizens shoul MY RECORD OF SERVICE DURING FIRST TERM.
